

# Corridor News

## SPECIAL POINTS OF INTEREST:

- Corridor has changed the frequency of newsletter publication from every three months to every four months until further notice.

VOLUME 7, ISSUE 1

APRIL 30, 2013

## INSIDE THIS ISSUE:

Sponsorship Update	1
Corridor High School Scholarships	1
Corridor News Available on Website	1
Seismic Update	2
Drilling and Completions Update	2
Production Operations Update	2
Safety and Environment Update	3
For More Information About Natural Gas	3
Upcoming Activities	3
Call Before You Dig	4

### Corridor's Safety Slogan

*"At work, rest and play: safety first every day."*

## Sponsorship Update

Corridor received 16 sponsorship requests from Penobsquis and the surrounding areas since the last newsletter. Sponsorship funding was awarded to the following organizations: Canadian Institute of Mining Metallurgy & Petroleum/Potash Corp; Sussex Care Pregnancy Centre; and Greater Fundy Ground Search and Rescue Association. Requests are still under review from the following organizations: Sussex and District Chamber of Commerce; Atlantic Balloon Fiesta; Sussex Middle School; Softball Canada Games; Penobsquis Community Enrichment Committee; Snider Mountain Ranch; Penobsquis Family Fun Day Committee; Havelock Lions Club; Sussex Regional High School Improv Team; and Greater Fundy Ground Search and Rescue Association (Project Lifesaver).

## Corridor High School Scholarships

Letters were sent to Sussex Regional High School and Petitcodiac Regional School on February 5, 2013. The deadline to submit an application for consideration for a Corridor Scholarship was May 15, 2013. Applications have been received and are currently under review.

## Corridor News Available on Website

In an attempt to improve upon our environmental responsibility, Corridor Resources discontinued hard copy distribution of its newsletter in Volume 6, Issues 1 through 4 (2012 calendar year). We will continue, posting copies of its newsletter on the Corridor Website at: [www.corridor.ca/about-us/corporate-responsibility-community-engagement.html#corridornews](http://www.corridor.ca/about-us/corporate-responsibility-community-engagement.html#corridornews). Beginning with this issue, Corridor will begin hard copy distribution again, as it has come to our attention that some community members were unable to access the newsletter or were unaware that the newsletter is still being published.

## Seismic Activity Update

No seismic activities are planned for Q2 of 2013.

## Drilling and Completions Update

### Drilling

Corridor currently has no drilling plans for Q2 2013 in New Brunswick. We continue to evaluate future opportunities.

In the last newsletter, Corridor reported that it was starting to have discussions with the government regarding a potential pilot project in Elgin that would involve drilling and fracture stimulation on two existing well pads in Elgin at Green Road and

Will DeMille. Before Corridor can start planning for this proposed project, it needs to gain a better understanding of the new royalty regime in New Brunswick. Once this royalty regime is announced and Corridor has had an opportunity to review it, we will determine our next steps with respect to the Elgin pilot project. No operations related to the pilot project will take place in 2013. Corridor will provide updates in future newsletters.

### Completions

There are currently no completion plans for Q2 2013. Work over opportunities on existing McCully wells are being evaluated.

## Production Operations Update

The McCully Field Production Operations are steady and running as normal. Field personnel are continually assessing and implementing process improvements to optimize flow and operation of the Gas Plant.

## Safety and Environment

The HSE Team continues to support corporate initiatives and field operations. The Corridor HSE Team has reviewed the New Rules developed by the New Brunswick government and is in the process of updating its plans and developing new ones to comply with the new requirements.

No incidents occurred from January through April of 2013 during Corridor's operations.

## Upcoming Activities

- The next newsletter will be published on August 31, 2013.
- Community Liaison Committee meetings are deferred until further notice.
- Due to the limited field activities, other than normal Production Operations, the McCully Joint Health and Safety Committee meetings will be deferred until such time that field activity increases.

## For More Information About Natural Gas

There has been a lot of discussion in New Brunswick about oil and natural gas exploration and production.

For more information, the following websites can be consulted:

Canadian Society for Unconventional Resources - [www.csur.ca](http://www.csur.ca)

Canadian Gas Association - [www.cga.ca](http://www.cga.ca)

Canadian Association of Petroleum Producers (CAPP) - [www.capp.ca](http://www.capp.ca)

American Natural Gas Association - [www.anga.us](http://www.anga.us)

Natural Gas From Shale (NB Government website) - [www2.gnb.ca](http://www2.gnb.ca)

# Call Before You Dig

Be safe and call before you dig.

Please provide two business days in

advance of the

proposed ground disturbance

- The New Brunswick Pipeline Act, 2005, requires anyone proposing to undertake ground disturbance near a pipeline to determine the location of the buried pipeline and to advise the pipeline operator before any ground disturbance.
- Corridor's "Call-Before-You-Dig" program provides guidance to landowners and other third parties on actions to be taken before undertaking any ground disturbances within 30 metres of the transmission pipeline Right of Way (RoW) and within 20 metres of the gathering system pipeline RoW.
- The "Call-Before-You-Dig" line, **1-800-880-5705**, is operated on a 24 hour/7 days a week basis and calls to the number are answered by one of the answering service personnel. This person will provide information about the location of Corridor's pipelines. The information and excavation request will be forwarded to a Corridor representative, who will follow up with the caller to discuss the ground disturbance and inspect the location of the proposed ground disturbance. Corridor will notify the landowner of any special requirements for working in the area near the pipeline.
- Written permission from Corridor is required prior to any ground disturbance.
- Corridor has posted signs along the pipeline route with the "Call-Before-You-Dig" information and phone number.

#301, Cornwallis House  
5475 Spring Garden Road

Corridor is an Eastern Canadian junior resource company engaged in the exploration for and development and production of petroleum and natural gas onshore in New Brunswick and Québec and offshore in the Gulf of St. Lawrence. Corridor currently has natural gas production and reserves in the McCully Field near Sussex, New Brunswick and crude oil reserves in the Caledonia Field near Sussex, New Brunswick. In addition, Corridor has contingent resources and discovered resources in Elgin, New Brunswick and undiscovered resources on Anticosti Island, Québec where Corridor has ongoing exploration projects.

### **Corridor Mission Statement**

*Corridor Resources is focused on the exploration and development of oil and gas in eastern Canada. Corridor is dedicated to safe work practices, environmentally responsible operations and the highest level of business integrity. With a strong leadership team supported by devoted employees and contractors, Corridor aims to create shareholder value by expanding its reserves and production while fostering successful partnerships in the communities in which we live and work.*
